– stop_without_location

stop_without_location

stop_lat and/or stop_lon is missing for stop with location_type equal to 0, 1, or 2

stop_lat and/or stop_lon are required for locations that are stops (location_type=0), stations (location_type=1) or entrances/exits (location_type=2).

You can see more about this notice [here](#).

csvRowNumber (?)	locationType (?)
20305	"STOP"
20306	"STOP"

– duplicate_route_name

duplicate_route_name

Two distinct routes have either the same route_short_name, the same route_long_name, or the same combination of route_short_name and route_long_name.

All routes of the same route_type with the same agency_id should have unique combinations of route_short_name and route_long_name.

Note that there may be valid cases where routes have the same short and long name, e.g., if they serve different areas. However, different directions must be modeled as different routes.

Example of bad data:

route_id	route_short_name	route_long_name
route1	U1	Southern
route2	U1	Southern

You can see more about this notice [here](#).

– fast_travel_between_consecutive_stops

fast_travel_between_consecutive_stops

A transit vehicle moves too fast between two consecutive stops.

The speed threshold depends on route type:

Route type	Description	Threshold, km/h
0	Light rail	100
1	Subway	150
2	Rail	500
3	Bus	150
4	Ferry	80
5	Cable tram	30
6	Aerial lift	50
7	Funicular	50
11	Trolleybus	150
12	Monorail	150
-	Unknown	200

You can see more about this notice [here](#).

Only the first 50 of 2525 affected records are displayed below.

– fast_travel_between_far_stops

fast_travel_between_far_stops

A transit vehicle moves too fast between two far stops.

Two stops are considered "far" if they are more than 10 km apart. This normally indicates a more serious problem than too fast travel between consecutive stops.

The speed threshold depends on route type and are the same as fast_travel_between_consecutive_stops.

You can see more about this notice [here](#).

Only the first 50 of 53 affected records are displayed below.

– missing_recommended_file

missing_recommended_file

A recommended file is missing.

You can see more about this notice [here](#).

filename (?)
"feed_info.txt"

– mixed_case_recommended_field

mixed_case_recommended_field

This field has customer-facing text and should use Mixed Case (should contain upper and lower case letters).

This field contains customer-facing text and should use Mixed Case (upper and lower case letters) to ensure good readability when displayed to riders. Avoid the use of abt accessibility by screen reader software and voice user interfaces.

Good examples:

Field Text	Dataset
"Schwerin, Hauptbahnhof"	Verkehrsverbund Berlin-Brandenburg
"Red Hook/Atlantic Basin"	NYC Ferry
"Campo Grande Norte"	Carris

Bad examples:

Field Text
"GALLERIA MALL"

Notice Code

"3427 GG 17"
"21 Clark Rd Est"
